I shouldn't have to point this out, but looking at the past two threads it seems like I do. So remember: THIS IS NOT THE PATREON THREAD.

Happy fapping.

As is right now, it's a bit of a mess. Could you please fix it so it will be the definitive all-redd-in-one-place drive?

61 files have exact duplicates (most new files uploaded twice).

And these previously shared sets are mostly or entirely missing:

2018-02 / Lindow

2018-02 / Sidon and Link (fullsize pics corrupted)

2018-04 / Daisuke and kou

2018-04 / komaeda and hinata

I uploaded the following folders:

-lindow

-daisuke and kou

-komaeda and hinata

And fixed the problem with the damaged full size pictures of the sidlink folder.

Also erased the duplicated pictures (im not sure if all of them, so if someone notices it, please point out the name of the folder).

At least i'm sure that the newest sets with exact duplicates were erased.

if there is something missing, please point it out and i'll see what can i do.

Site owner/OP here. I redesigned the site to fit more with Google's new Drive design. You can enable it by clicking on that checkbox at the top. The site stores your choice locally so you only have to set it once.

Don't really know why I'm writing this, I guess I just wanted to let you know I'm still alive, here, and reading/monitoring this thread.

So it may be that you've opened it before the scheduled update or your browser's cache contained an outdated version. In any case, if you find any more problems with it that are not fixed by a clean refresh (ctrl+f5), report them here and I'll try to sort it out.

This has nothing to do with your drive in particular, rather with imperfection of the current update system implementation.

In means, when too many folders are updated in the same drive, they are not grouped in any way on update page, taking up lots of space and making it harder to find the small, 1 to 2 folders updates from other drivers.

I'll fix that as soon as I'll have enough time :3
